Hoover windtunnel 2 rewind whole house vacuum — \$120

Each product we feature has been independently selected and reviewed by our editorial team. If you make a purchase using the links included, we may earn commission. Vacuuming floors may seem like a chore, but having a highly effective cleaner on hand can minimize the hassle. If your current vacuum isn't removing dust, dirt, and pet hair in one fell swoop, it might be time to swap for a cleaner with higher suction power, such as the Hoover WindTunnel Corded Bagless Upright Vacuum. Right now, shoppers can snag the top-rated model at the discounted price of \$96 on Amazon. Equipped with five-levels of height adjustment, the vacuum cleaner can move across varying kinds of surfaces with ease, including hardwood floors, low carpets, and high carpets. It has a HEPA filter that traps nearly 100 percent of dust and fine particles, and a bagless compartment that reviewers say is incredibly simple to empty. What's more, the cleaner comes with multiple attachments for cleaning hard-to-reach areas and tiny crevices in your home. Users can easily navigate around the room while remaining tangle-free, thanks to the 25-foot cord that retracts with the click of a button. Buy It! Hoover WindTunnel Corded Bagless Upright Vacuum, \$95.98 (was \$119.99); amazon.com "This thing has got suction like I have never seen before," shared one person. "We have two cats now, and have had three previous cats prior to the ones now. Having said that, this vacuum cleaner was able to get ALL fur off the flannel bed sheets, suede couch, and bed comforter. I haven't been able to do that ever with the previous cleaner. The attachment for fur works miracles!" "With four cats and two kids you can only expect so much from a vacuum," wrote another. "We vacuum almost daily and so far this has been a fantastic purchase. The suction has kept up with cat hair, litter, and everything else so far. There is sufficient power and it's relatively quiet. It's not too heavy (average to lightweight) and easy to maneuver/operate. I would place this at the top of a middle tier vacuum. It's proven to be worth the price." Whole Home Cleaning from Floor to CeilingGreat for PetsDeep Cleaning Power with WindTunnel 2 Technology WindTunnel 2 Whole House Rewind Upright Vacuum \$169.99 WindTunnel 3 High Performance Pet Upright Vacuum \$179.99 \$249.99 WindTunnel Cord Rewind Pro Upright Vacuum \$129.99 WindTunnel T-Series Bagged Upright Vacuum \$129.99 \$169.99 Item added to cart. Item could not be added to cart. Quantity selected may exceed available supply. Description Hoover® WindTunnel® 2 Whole House™ Rewind is perfect for Whole Home Cleaning from Floor to Ceiling. The Multi-Floor Brush Roll allows you to turn the brush roll on for optimal cleaning on carpets and off to prevent scattering of debris on hard floors for a more effective clean. Advanced Multi-Cyclonic Technology gives you a continuous cleaning experience with No Loss of Suction,** while WindTunnel® 2 Technology creates 2 channels of suction to lift and remove surface debris and deep down embedded dirt. The hassle-free 25 ft. power cord automatically retracts in seconds, so you never have to wrap a cord again and with up to 16 ft. of cleaning reach you can clean dirt and dust anywhere. Advanced AllergenBlock™ Technology, Filter Made with HEPA Media, odor-absorbing carbon and Pet Turbo Tool make WindTunnel® 2 Whole House™ Rewind great for pet owners. Features Hassle-free Cord Rewind - 25 ft. power cord automatically retracts in seconds so you never have to wrap a cord again. Deep Cleaning Power - WindTunnel® 2 Technology creates 2 channels of suction to lift and remove surface debris and deep down embedded dirt. Extended Cleaning Reach - With up to 16 ft. of cleaning reach, so you can clean dirt and dust anywhere in your home with our live hose and tools. Optimized Cleaning - The Multi-Floor Brush Roll allows you to turn the brush roll on for optimal cleaning on carpets and off to prevent scattering of debris on hard floors. No Loss of Suction** - Our advanced Multi-Cyclonic Technology gives you a continuous cleaning experience with No Loss of Suction. Great for Pets - Advanced AllergenBlock™ Technology, filter made with HEPA Media, odor-absorbing carbon and Pet Turbo Tool. Eliminate Pet Odors - Our Filter is made with an odor-absorbing carbon layer to help eliminate pet odors. Clean from Floor to Ceiling - Specialized pet tools for Whole Home Cleaning. AllergenBlock™ Technology - Our HEPA Media Filter captures 97% of pet dander, dust and pollen particles and blocks* them from re-entering the air. *Based on ASTM F1977 using particle sizes down to 0.5 microns picked up from your vacuum. **Per IEC 60312-1 1st Edition, Clause 5.9. The vacuum is on the heavy side and some folks find it bulky and a bit of a chore to move and maneuver. Also, the power cord, while auto-retract, is a bit short which can be frustrating when cleaning a large area. On the plus side it does excel at picking up pet hair and is a relatively affordable vacuum cleaner. In addition it comes with a HEPA filter that includes a layer of carbon for odor elimination. Quick Specs Type Upright Bagged/Bagless Bagless Best for... Bare Floors & Carpet Pet Hair Features Yes Approx. Weight 17 lbs HEPA Filter Yes Power Cord Length 25 ft Motor Driven Brushbar Yes Warranty 3 Years Consumer RatingsWe found 76 consumer ratings from well-known retail outlets. When averaged these ratings result in an overall score of 79.4 out of 100. This is lower than the average for upright scores on our site but not far off (the average is about 81). You can see all the vacuum ratings/scores in our vacuum cleaner finder, or you can see our upright vacuum ratings or Hoover vacuum ratings. Source Consumer Rating #Ratings Amazon 3.9 stars out of 5 50 Target 4.0 stars out of 5 20 Kmart 4.5 stars out of 5 6 What Are Owners Saying?A thorough analysis of owner comments and insights has provided the following common UH71250 pros and cons: PROS: Retractable power cord- Works well on pet hair- Reasonably priced- Hose is long CONS- A bit heavy- Short power cord Probably the most difficult characteristic of this vacuum to nail down is the suction. Is it good or is it bad? Many owners report that the suction is very strong and that the machine has great pickup but there are also quite a few folks who report poor suction. It does not appear that this is simply people with different ideas of what good suction is, but rather that some machines are actually exhibiting less suction than others. Hoover suggests that machines with poor suction may be the result of dirty filters or perhaps clogs somewhere along the air path of the vacuum. The vacuum manual at the bottom of this article provides some instructions to possibly remedy this. The combined cleaning reach of the wand and hose is reasonably good but the power cord is not particularly long. Many owners complain about having to unplug and replug the vacuum frequently. Having said that, the automatic rewind power cord is a feature owners love, and it is likely that the "shortish" power cord is the result of adding this feature. Most owners agree that the vacuum performs admirably on pet hair - both on carpet and bare floors. The pet turbo tool also works well. As the name suggests the "Whole House Rewind" is indeed capable of cleaning many areas of the home including carpets, bare floors, window sills, furniture, couches, ceiling fans, etc. Folks also seem pleased with the reasonably low cost of the vacuum - it can sometimes be found in the neighborhood of \$120-130. This upright is a bit on the heavy side however, (above average weight for an upright) and some folks find the unit bulky and hard to move around. You can read more owner reviews on Amazon. Brushroll & Height ControlsThe Hoover UH71250 has a motorized brushroll with on/off controls (controlled via a foot pedal). This enables the vacuum to perform on both carpet and bare floors. Typically carpet is vacuumed with the brushroll ON (to loosen dust and debris and help pull it up) and bare floors are vacuumed with the brushroll OFF (ensures no scattering and also, in some cases, no scuffing of delicate flooring). There are 5 different height settings available via a dial located on the top of the vacuum nozzle (see image below). These settings raise and lower the nozzle allowing it to be set to an effective cleaning height on different floor surfaces. Setting 1 is for hard floors and settings 2 through 5 are for carpet (2 for low pile carpet and 5 for the highest pile carpet). Note: We notice that for carpet deeper than 1 inch Hoover recommends turning the brushroll OFF. This makes sense as with carpet this deep it may be possible for the brushroll to cause damage. WindTunnel & Cyclonic TechnologyThis vacuum has what Hoover refers to as Windtunnel 2 technology. The company is somewhat vague about this particular technology but the 2 apparently stands for 2 channels of suction. They also indicate that normal WindTunnel Technology only has 1 channel of suction. We have also seen WindTunnel 3 Technology which, we can only assume, uses 3 channels of suction. Does this "technology" really help with cleaning ability? Well, in theory it makes some kind of sense to spread the suction more uniformly across the nozzle via multiple suction channels but we have yet to see or read of any real proof of better cleaning results. The UH71250 is bagless and it uses something called cyclonic technology (in this case they call it multicyclonic technology as there are 2 cyclones). Cyclonic technology involves sending the incoming air through one or more cyclonic cylinders that spin the air very rapidly. As the air spins the dust and debris are forced out - via centrifugal force - and into the dust canister. Cyclonic technology helps to keep the filters cleaner longer and it provides no loss of suction as the dust canister fills (as opposed to many bagged vacuums where the suction can drop as the bag fills). FiltrationThe Hoover WindTunnel 2 Whole House Rewind has two filters. A pre-motor filter and a HEPA filter (post motor). The pre-motor filter is rinsable and, with normal household use, should probably be cleaned about every 2 months. The HEPA filter cannot be rinsed/washed so when the filter is dirty one should just tap out the dust and debris over a dustbin. Hoover reports that the HEPA filter is designed to last the warranty period of the vacuum (3 years) before it needs replacing. The HEPA filter also has a carbon layer which absorbs odors. This is a great feature in households with pets and even smokers. ToolsThe vacuum includes 3 tools: Pet Turbo Tool (this is a handtool with a small suction driven brushroll. It is useful for cleaning carpeted stairs, upholstery, mattresses, etc.) - Crevice Tool (great for getting into tight areas, along edges and baseboards, etc.) - Pivoting Dusting Tool (this has 5 cleaning positions and is useful for cleaning fans, light fixtures, some draperies, etc.) These tools all store on-board the vacuum so they are quickly accessible when needed. They fit on the end of the vacuum wand (also in the tools image below) or the hose. We do notice that these are all compression fit however. This means they are attached by simply pushing them onto the hose or wand (no clicking together or buttons to release). Compression fit works but it is not as elegant a solution as "click fit" and it sometimes results in the tools falling off or getting stuck on. Dust Canister, Weight, WarrantyThe dust canister has a capacity of 1.29 liters and we have heard no complaints of having to empty it too frequently (meaning it is not too small). It is fairly straightforward to remove it from the vacuum, to empty it, and to reattach it to the vacuum. It is bottom release (which is typical). Additional features include a 13.5 inch cleaning path (which is quite wide), 2 rear wheels, a thermal protector (that will shut the motor off should it get too hot), and a carry handle. There is also a "System Check Indicator" that will turn red to alert you of a possible problem such as a dirty filter or a clog. This appears to be an indicator that is triggered by reduced airflow and there are a few possible solutions in the manual (see bottom of review) should this occur. This vacuum weighs in at 17 lbs which is a bit on the hefty side. We have seen some uprights that weigh 20-22 lbs so it isn't a behemoth but there are also many at the 14-15 lb level. The Hoover WindTunnel 2 Whole House Rewind carries a 3 year limited warranty (for domestic use). Vacuum Cleaner ManualThe manual is short at only 16 pages but it covers most of the basics such as assembly, operations, tools, maintenance and troubleshooting. See it here: Hoover WindTunnel 2 Whole House Rewind Manual #1 CORDLESS VACUUM: Dyson V8 Absolute (94/100) #1 UPRIGHT VACUUM: Shark NV752 TruePet (94/100) Also see Shark NV801 (94/100) #1 CANISTER VACUUM: Miele Complete C2 Hard Floor (93/100)
